| 3Mlamp |

The Mlamp suggests a way of presenting a light bulb in its purest form, stripped of the non-essential.

M stands for meter: 3M is 3 meter of iron.

| Litho |

A cylindrical stone encasing a spherical lightbulb. Both the diameter and the height of the stone equal the diameter of the lightbulb. The lightbulb carves its way through the stone pedestal, rotating around the stone. Litho is a moment in this perpetual motion.

The litho is produced in cooperation with Lieven Goetinck and stone carver Peter Vromman.

Litho is produced in series of 20.
For every edition, a different type of stone is carved.

The first series is made of a terrazzo pedestal
The second series is made of a blue stone pedestal

Iron square tubes are assembled according to the three orthogonal axes.
Wood slides into these connections.

The XZ-axes are connected and form the table surface.

Oak wooden planks form the tabletop.

The Y-axis defines the height of the table.
